## KYB-CONMAT Japanese Precision Indian Advantage

KYB-CONMAT Concrete Mixers are produced in India with design developed and tested by KYB of Japan. KYB has produced more than 100,000 Transit Mixers over the period of last 60 years.

MR Series concrete mixer has been developed and tested by simulating toughest Indian working conditions and has gone through rigorous field trials in tandem using state-of-the-art sensing and monitoring devices. These proven MR Series Concrete Mixer are working across various construction sites in India for the past 2 decades.

MR Series has very high speed concrete charge and discharge, for increased productivity and can handle very low slump concrete, hence can be used in variety of construction jobs conventionally not suitable for TM application.

KYB-Conmat products are delivered to Customers around the world with high quality and safety propelled by Japanese Technology.

- MR Series's high speed charge / discharge performance is due to its unique blade design.
- High precision 'C' Shaped spirals are formed by accurate forming dies, maintaining uniform, low resistance flow resulting in low power consumption.
- 'C' shaped spirals enhance agitating performance, so concrete could be worked with even during delays.
- Low filling level due to high geometric and water line volume-improves mixing performance.

- Due to its unique blade design, spiral has wider flute and thus has bigger charge / discharge volume per revolution of the drum.
- Contact area between blades and concrete / unit volume is lower, hence low adhesion of concrete on the spiral resulting in low friction and low power consumption.

## Data &amp; Facts

Sr.No.	Description	MR 60C	MR 70C	MR 70XL	MR 80
1	Nominal Volume (cu.mtr)	6	7	7+	8
2	Filling Height (mm)	2630	2630	2630	2660
3	Mixer Width (mm)	2350	2350	2350	2350
4	Drum Dia (mm)	2267	2267	2267	2267
5	Drum Speed (rpm)	0-14	0-14	0-14	0-14
6	Water Tank Capacity (ltr)	450	450	450	600
<b>Driven By</b>					
7	Drive-P.T.O.□ /Slave Engine○	<input type="checkbox"/> ○	<input type="checkbox"/> ○	<input type="checkbox"/> ○	<input type="checkbox"/>
8	Slave Engine Power (kw)	52	52	52	-

- Due to extra low slump and high discharge performance, KYB-CONMAT Transit Mixer can suitably be used for slip form concrete paving.
- Detachable Charge Hopper and Split Flow guide facilitate maintenance.
- Drum, Spiral, Hopper, Flow guide, Discharge Chute are made of wear / corrosion resistant material.
- Superior rear design eases cleaning and use of cleaning equipment.

P.T.O. Driven

Higher safety during transit due to anti-clockwise Drum rotation for left side travel in India. Low center of gravity for better stability on rough roads

Quality Inspection like an automobile

A wear-proof round bar protects Drum Spiral without concrete accumulation

Chute is locked by a simple operation for enhanced safety during concrete pour

Staircase to inspection platform is designed for operator comfort without compromising safety
